

Treatment Centre for Substance Dependence

REFERRER TO COMPLETE

The referrer is also encouraged to assist the patient in completion their own application form.

The aims of the application form are:

- To establish and improve the patient's motivation for treatment.
- To obtain important information for treatment.

Please note that the completion of this form already confronts the patient with his/her addiction problem and consequently forms part of the treatment. Please attend to it carefully to benefit the patient.

IMPORTANT PROGRAMME INFORMATION FOR THE REFERRER AND PATIENT

- All the referrals to Ramot have to be made by a registered professional person, e.g. a social worker, physician, psychiatrist, minister of religion, health professional, Human Resources/EAP etc. (hereafter the "referrer"). The referrer also renders after-care services to the patient or refers such services to a trained professional person. The referrer may not be a family member or friend of the patient.
- Ramot evaluates patients prior to admission to ensure maximum benefit will be derived from the programme. In cases of e.g. senility, retardation, psychosis, psychopathy or serious sicknesses, the patient is referred to a suitable institution for specialised treatment.
- The first 3 - 7 days are spent in the detoxification unit after which the patient does a 4 week psychotherapy programme.
- Afrikaans speaking patients must understand English as the audio visual programme is presented in English.
- All private patients need to pay the full tariff prior to or on the day of admission
- Patients must please arrive at 08:30 for admission with the required items (e.g. Pocket money, key deposit, cigarettes, and medication).
- The programme may not be interrupted by court cases or other personal matters. It is in the patient's interest to focus fully on the programme. Please arrange that court cases or other matters be postponed until discharge.
- Please ensure that everything has been arranged at home/work to enable the patient to focus fully on the treatment programme.
- Ramot provides a healthy and balanced diet but does not cater for individual food preferences.
- Aftercare/continued treatment is essential for maintaining sobriety. Please treat aftercare as important as it does contribute significantly to the success of the treatment programme.
